## 2006 Annual Report – a Fifteen Year Celebration

The first 10 years – <http://www.recafoundation.org/2002.rtf>

**2002 – 2006** Expanded the focus on children, family and community.

- **Computer Reuse and Repair Program:** RĒCA became the first MAR (Microsoft Authorized Refurbisher) in Washington State. Over 300 Internet ready computers have been placed with low income families, low income college students, and single moms. Over 250 computers have been repaired and made Internet ready, at significantly reduced fees, for the same target population. Over 500 beginning computers have been placed with kids (ages 3 – 12) in low income families. See <http://www.cbpin.org/recycle.htm> for program details.
- **4People Community Resources and Case Management:** RĒCA first became involved in 4People and has evolved into a partnership that is making the lines between the two organizations indistinguishable. A goal for 2007 is to work toward common vision and mission statements. See <http://www.4people.org/About.html> for details of this evolution.
- **Web design and Hosting Program:** The last 5 years have seen a sharp increase in this program. The Columbia Free-Net server now hosts 17 non-profit domains as well as numerous other non-profits that are a part of the TCFN.org domain (e.g. <https://www.tcfm.org/soroptimist>).

RĒCA Foundation thanks our many sponsors over the years and our numerous volunteers. See <https://www.tcfm.org/sponsors> for details. Thank you everyone!

**Financials:** See <http://www.recafoundation.org/2006/2006financials.rtf>
